

Covid guideline and H&S policy

The extra measure we are taking are as follows:

- Extra sanitation of vehicles, warehousing and logistics.
- All staff have been trained in the safe handling of objects.
- All our inflatables are manufactured from NHS grade PVC to start with which contains high levels of Anti fungicides and Antibacterial agents. These agents ensure 99.9% of all known germs are killed within 72 hours, ensuring maximum safety at all times and minimum risk of infection.
- All inflatables and goods are fully sanitized before hire periods if they have been out during the pandemic.
- If we are supervising the equipment, we are cleaning in between bubbles or on a regular basis
- Our staff will wear masks as required.
- We are adhering to social distancing policies in the workplace and washing hands as recommended.
- If our staff are supervising or operating the equipment we will supply a sanitize station to include hand sanitizer and wipes for all users. If the equipment is hired only we would suggest you provide a sanitize station.
- We are able to offer contactless deliveries for peace of mind.
- We are able to offer contactless payment.
- We will be continuing to operate in with the Covid-19 guidance published on www.gov.uk

All our inflatables are manufactured from the same NHS grade PVC used to manufacture Hospital birthing mats, Table covers and other sterile medical bags to start with which contains high levels of Anti fungicides and Antibacterial agents. These agents ensure 99.9% of all known germs are killed within 72 hours, ensuring maximum safety at all times and minimum risk of infection
